REFERENCE

2627258

RELEASE DATE

2 September 2026

SUBJECT

Requesting information about road vehicles currently owned, leased or operated by Northern Ireland Water.

RESPONSE

Northern Ireland Water holds information within the scope of your request. The attached schedule provides the make and model, colour, first registration date, and MOT expiry date recorded for each vehicle identified as falling within scope. Northern Ireland Water holds the vehicle registration marks requested. However, it has decided to withhold this information under Regulation 13 of the Environmental Information Regulations 2004.

The schedule includes vehicles recorded as in service and vehicles recorded as out of service or subject to a Statutory Off-Road Notification at the time of updating the information on 2 September 2026.

Some MOT expiry dates in the schedule may have passed. The corresponding vehicle status should be read alongside the MOT information. A vehicle with an expired MOT may have been recorded as out of service, subject to a Statutory Off-Road Notification, awaiting disposal, undergoing repairs or awaiting a further MOT test. An expired MOT date does not, by itself, establish that the vehicle was used on a public road without a valid MOT.

Fleet records are subject to change as vehicles are acquired, removed, disposed of, taken out of service or returned to service. The schedule therefore represents the information recorded and verified for this response at the stated date. It should not be taken as confirmation of the status of any vehicle after that date.
