

About NI Water

It costs around £680m each year to deliver water services in Northern Ireland. Thousands of assets at a balance sheet value of around £4.7bn, are operated and maintained to provide these services. This includes over 43,700km of water mains and sewers - one and a half times longer than Northern Ireland's entire road network and long enough to circle planet earth.

Households and businesses

Our customers rely on the services we provide

Water treatment works

We clean the water, making it safe to drink

Water mains length

We distribute the drinking water to our customers through water mains

Pumping stations

We use pumping stations to get the drinking water to our customers

Service reservoirs

We store the drinking water in service reservoirs*

Households and businesses

We collect wastewater from our customers

Length of sewers

We collect wastewater from our customers using a network of sewers

Pumping stations

We use pumping stations to get the wastewater to our treatment works

Wastewater treatment works

We treat wastewater and return it to the environment

Sludge management centres

Sludge is de-watered before being incinerated

*Number of service reservoirs in service and scheduled for regulatory sampling in line with the drinking water regulations.
